

MAKE A MISTAKE? WE'RE HERE TO HELP!

CincyMLS is committed to maintaining the most accurate data possible. If an error occurs, please contact CincyMLS promptly so the information can be reviewed and corrected. There is no need to cancel and relist the listing.

SOLD INFORMATION

After a listing is changed to Sold, the sold information should be verified by both the listing agent and the selling agent. All errors should be reported to MLS as soon as possible; however, any errors identified regarding the buyer's agent must be reported within 30 days of closing to allow staff to make corrections.

INCORRECT ENTRY PRICE

Contact CincyMLS immediately if the original price is entered incorrectly. Staff can correct the original price and often make it appear as though no error occurred if corrected before a change from the original status, including moving from Coming Soon to Active.

CHANGES

Staff can correct most price change and status change errors, including the removal of indicators, if they are reported immediately. The sooner we are notified, the easier it is to make corrections; if too much time has passed, corrections may no longer be possible.

Accurate, timely reporting helps protect the integrity of MLS data. Verifying information and promptly reporting errors allows corrections to be made quickly and efficiently.
