

Generating FlexCodes in SentiLock

Need to grant access to a non-member? Learn how to generate FlexCodes in SentiLock.

From the SentiLock App

Tap the three lines at the top (hamburger menu).

Tap My Lockboxes then Get Access Code.

Choose the keybox (keybox must be assigned to a property).

Enter the name of the person using the code.

Choose the start date, end date, and times. Note - may need to choose am or pm first.

Tap Get Flex Code.

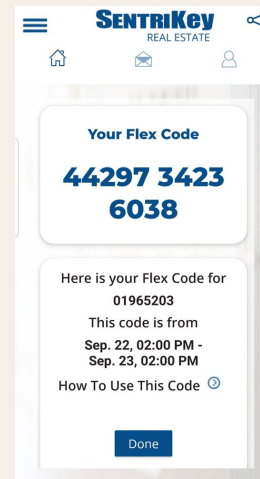

Tap the Share icon in the upper right corner to email or text the code.

13-Digit FlexCode

FlexCodes offer secure, controlled property access for the occasional subcontractor, out of area agent or appraiser, inspector, or other non-members.

To use the FlexCode, push ENT on the keybox, enter the 13-digit FlexCode, then push ENT once more.

For better access tracking and reporting, SentiLock also offers non-member access through the SentiConnect feature. Check future Tuesday Tips for more information.
