

HOW TO OPEN YOUR ELECTRONIC KEYBOX

Have you downloaded the SentiKey® Real Estate App?

The SentiGuard® electronic keybox can be opened using NFC (Near-Field Communication) technology available in many smartphones. This technology, called Touch-N-Show in SentiLock, allows phones and other devices to communicate with each other. They can also be opened using Bluetooth® technology.

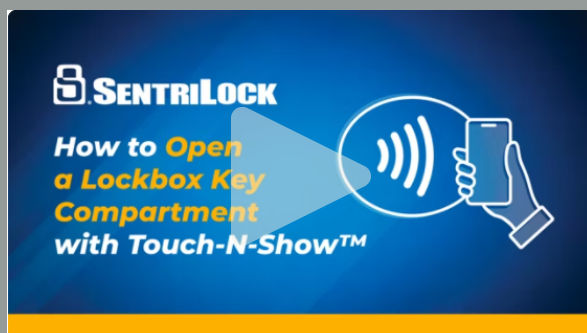

In all cases, first, download the SentiKey® Real Estate App. Look for the SentiKey® logo in your app store or play store. If you have not activated your SentiLock account, call CincyMLS.

Hints:

- *Be sure NFC is activated in the settings of your smart device if using Touch-N-Show.*
- *Press enter on the keybox when using Bluetooth to activate the box.*

SentiLock has provided these brief videos on how to use the app to open the keyboxes. There is also a Help section in the app to assist.
