

A PICTURE IS WORTH 1,000 CHARACTERS

Sometimes, Marketing Remarks alone don't do justice to all the great features your listing has to offer, whether you're sharing it with peers on CincyMLS or consumers through Client Portals.

Did you know you can use up to 1,000 characters to describe each photo in your CincyMLS listing? It's a great way to highlight all the details!

Go to View/Revise Your Listings, then choose Upload/Manage Pictures, and click the pencil for Edit. Under Description, enter up to 1,000 characters.

The text will display with the photos as they are scrolled through in MLS.

These descriptions are sent to third-party sites, but it's up to each vendor/portal if or how much of the text they display.

Bring Your Listing Photos to Life!
